## SUMMARY

Experienced professional with a strong background in data collection, manipulation, and analysis using SQL, Python, and Advanced Excel. Proficient in building, evaluating, and implementing models to solve complex business problems. Enthusiastic about leveraging data science, analytics, and development skills to drive organizational success across various domains.

## EDUCATION

**Bachelor of Technology - ECE,**  
Bhagwan Parshuram Institute of Technology  
(GGSIPU)

**CGPA: 8.24/10.0**  
2021

## SKILLS

- Hands on experience on SQL for data querying and manipulation.
- Strong Data analysis and visualization skills using Python.
- Advanced knowledge of Microsoft Excel, including data analysis, Macros, VBA, Stats and Pivots.
- Familiarity with statistical analysis and machine learning techniques.
- Experienced in Flask, API, Bootstrap, HTML, CSS.
- Excellent problem-solving and analytical abilities.
- Strong communication and teamwork skills.

## EXPERIENCE

### Also Energy (Stem Inc.): Data Analyst

Sep 2021 - Present

- Conducting data analysis and creating meaningful reports and visualizations using SQL and Microsoft Excel to identify patterns and trends, and make data-driven recommendations to the stakeholders to support decision-making.
- Advance site configuration of Solar sites using Excel's data analysis and pivot reporting to manage the site efficiently. Calculating Energy savings, Demands and analyzing data for different types of batteries to aid customer's choice of battery for energy savings.
- Real-time tracking and reporting of solar and other renewable plants.
- SQL Queries to fetch data from DataMart for troubleshooting the bills and optimizing battery's performance. Also developed live dashboard on Jira to actively track the process to increase its efficiency
- Co-led discovery, design, and implementation of new internal data verification process across fleet, leading to increased data reliability and accuracy.
- Development experience in SQL and Python to automate various processes across domains.
- Experience in manipulating both structured and unstructured data through statistical/numerical languages.

### Airport Authority of India: Internship

June 2019 – July 2019

- Gained exposure to air traffic control technologies, including radar, VOR, ILS, and other navigational aids.
- Studied the principles of VOR and ILS navigation systems and their role in ensuring safe and efficient aircraft operations.

## PROJECTS

---

### **Personal Portfolio Website**

April 2024

Designed and developed a personal portfolio website to showcase professional achievements, skills, and projects. Bootstrap for responsive design, HTML, CSS, and JavaScript for interactive elements. Flask framework for handling server-side logic and managing static content. Deployed on a platform like Render for easy access and scalability.

### **Weather And Travel Information App**

Sept 2023

Develop an application that provides users with detailed weather information and travel recommendations for a specified city. The app should leverage multiple RESTful APIs, including a weather API and a travel API, to offer a holistic view of the destination.

### **Cardiovascular Disease Analysis**

April 2023

Conducted a comprehensive analysis of a dataset comprising 70,000 patient records to identify the presence of cardiovascular disease. Leveraged Python libraries, including NumPy, SciPy, and Matplotlib, to perform data cleaning, processing, and exploration.
